1. Introduction

The newly developed INVESTech website serves as a comprehensive hub for all information related to the INVESTech project. Designed with user experience in mind, the site offers a seamless interface that allows visitors to easily access a wealth of resources on the INVESTech project. Users can explore detailed sections on the latest news, events, publications and other activities of the project. The website also features an array of tools and ways to learn about the project and its activities, as well as communicate with the project team to learn more about the project.

Beyond just providing information, the new INVESTech website aims to create a dynamic community through features such as subscription to newsletter. It hosts content related to the project, offering valuable insights from the consortium. Visitors can also find updates on upcoming events, project milestones, and opportunities for collaboration. With its rich content and user-friendly design, the INVESTech website is poised to become a go-to resource for anyone interested in the INVESTech project. Specifically, it provides updates on the main outputs of the project which are the Centres of Vocational Excellence (CoVEs) in the field of Information and Communication Technology (ICT), in five European countries, namely Slovakia, Greece, Bulgaria, Cyprus, and Lithuania, as well as the transnational cooperation web platform. Explore all that INVESTech has to offer by visiting their official website that can be found here: https://investech-cove.eu/

2. Demonstration

Below you can see some example parts/screenshots from the INVESTech website.

The newly developed INVESTech website consolidates all the valuable content of the INVESTech project into a modern, user-friendly platform. On the homepage, visitors are greeted with an overview of the project's mission and key features, along with quick links to the most popular resources.

At the end of the homepage and every other page on the website, the disclaimer can be shown on the bottom. The European Disclaimers section ensures transparency and compliance with regional regulations, providing visitors with essential information on legal disclaimers, data privacy policies, and user agreements. This section reassures users about the ethical standards and regulatory adherence of the project.
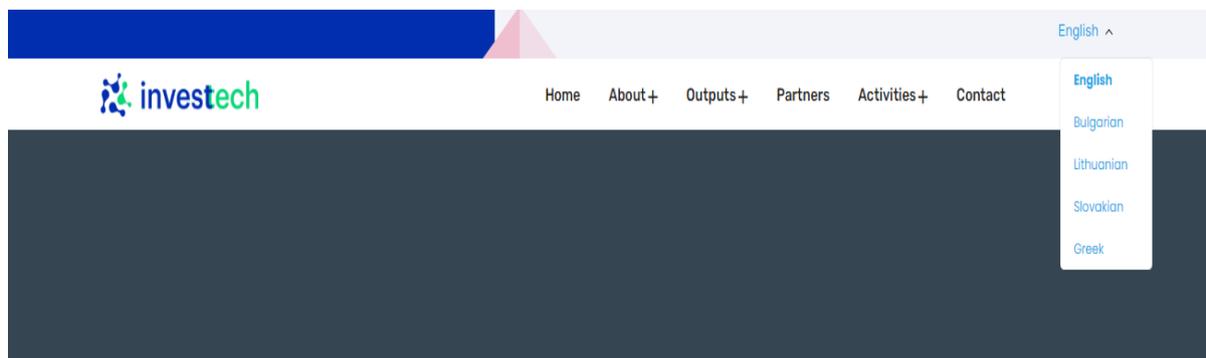

ABOUT US

About INVESTech.

INVESTech aims to support the establishment and development of a transnational cooperation platform of Centres of Vocational Excellence (CoVEs) in the field of Information and Communication Technology (ICT) across five European countries: Slovakia, Greece, Bulgaria, Cyprus, and Lithuania. The project seeks to address the evolving needs of the ICT sector by fostering collaboration among various stakeholders, enhancing skills development, promoting green transition, and ensuring social inclusion. By leveraging the Quintuple Innovation Helix (Q2IH) Framework, INVESTech will align CoVEs with regional smart specialisation strategies to support sustainable development and innovation.

READ MORE +

The About page delves deeper into the INVESTech project's goals, history, and team. It provides detailed information on how the project will work on the main outputs of the project which are the CoVEs in the field of ICT, in five European countries, as well as the transnational cooperation web platform..

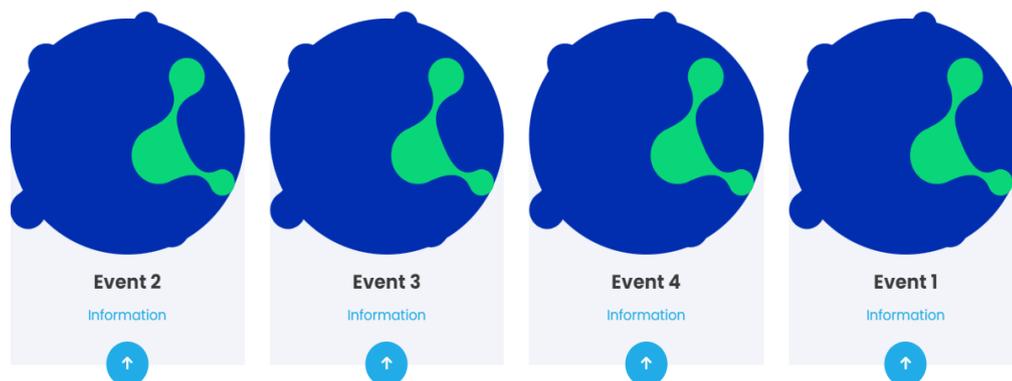

The website is accessible in multiple languages, ensuring that a wide range of users can benefit from the resources and information provided. Currently, the site supports adding content in English, Bulgarian, Lithuanian, Greek and Slovakian, catering to a diverse European audience. This multilingual approach reflects INVESTech's commitment to inclusivity and broad accessibility. Users can easily switch between languages through a convenient menu option, ensuring that language barriers do not hinder their ability to engage with the project's offerings.

Project Description

Home / Project Description

About the project

INVESTech project aims to: Create Centres of Vocational Excellence: Establish Centres of Vocational Excellence in Košice (Slovakia), Attica (Greece), Sofia (Bulgaria), Nicosia (Cyprus), and Klaipeda (Lithuania) and Develop a Sustainable Platform for International Collaboration: Create a transnational platform to foster cooperation and exchange of good practices among the Centres of Vocational Excellence (CoVEs) and relevant stakeholders.

INVESTech seeks to promote the innovation potential of VET in the participating countries by fostering collaboration between education, the labour market and other stakeholders; facilitating the development of skills and use of innovative technology; promoting green transition and social inclusion; providing opportunities for international collaboration and exchange of good practices, thus ensuring that VET can play a major role in supporting innovation, skills development, green transition and social inclusion

INVESTech will promote the creation of CoVEs in five European regions (Košice in Slovakia, Attica in Greece, Sofia in Bulgaria, Nicosia in Cyprus, and Klaipeda in Lithuania) by incorporating the Quintuple Innovation Helix (Q2IH) Framework, which promotes partnerships among the academic community, industry, public sector, civil society, and natural environment. By promoting collaboration among diverse types of stakeholders, the project aims to support the alignment of CoVEs with regional smart specialisation strategies with emphasis on sustainable development and innovation.

This section explains in more detail the fundamental goals of the INVESTech project.

Project Objectives

The project aims to

→ Create Centres of Vocational Excellence: Establish Centres of Vocational Excellence in Košice (Slovakia), Attica (Greece), Sofia (Bulgaria), Nicosia (Cyprus), and Klaipeda (Lithuania).

→ Develop a Sustainable Platform for International Collaboration: Create a transnational platform to foster cooperation and exchange of good practices among the Centres of Vocational Excellence (CoVEs) and relevant stakeholders.

→ Promote Innovation in VET: Facilitate collaboration between education, labour market, and other stakeholders. Incorporate innovative technologies and practices in vocational education and training.

→ Support Green Transition and Social Inclusion: Develop skills that contribute to the green transition. Promote social inclusion through vocational training.

→ Enhance Skills Development: Offer targeted training programmes and online courses for VET students and professionals. Provide opportunities for upskilling and reskilling across different EQF levels (4-7).

→ Implement the Quintuple Innovation Helix Framework: Promote partnerships among academia, industry, public sector, civil society, and natural environment. Align CoVEs with regional smart specialisation strategies focused on sustainable development and innovation.

→ Increase Capacity for International Collaboration: Develop tools and activities to build partners' capacity for international work. Create synergies with other EU networks and

In the Project Objectives section, the website outlines the specific goals that INVESTech aims to achieve. This section highlights the strategic steps INVESTech is taking to achieve these goals, such as creating COVE's in Kosice, Attica, Sofia, Nicosia and Klaipeda, as well as developing a sustainable platform, etc.
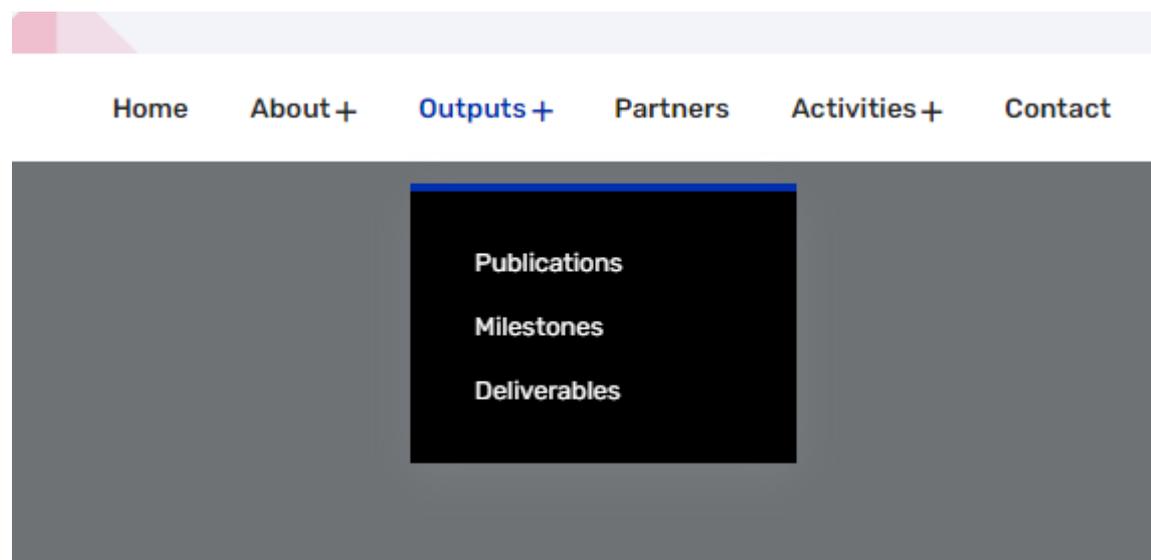

![invest tech logo]

The target groups of INVESTech include

Education organisations, offering Vocational Education and Training on ICT, at levels 4-7 of the EQF, VET students ,VET teachers and trainers, ICT professionals who wish to upskill or reskill from associations, training organisations, individuals, etc. companies, SMEs and startups in the ICT sector, regional authorities and policymakers responsible for VET, industry representatives in the ICT sector, innovation stakeholders (Innovation hubs, technology centres etc) research centres, civil society organisations and environmental NGOs, other CoVEs and the general public. In each country, these target groups are specified, and relevant organisations and stakeholders are identified that fall under these categories.

The Target Groups section identifies the primary audiences that the INVESTech project serves. This section is designed to help visitors understand how the project's offerings are tailored to different stakeholders. Some of them include education organizations, ICT professionals, SME's, research centers, etc. By clearly defining these target groups, the website ensures that each visitor can easily find relevant resources and information tailored to their specific needs.

Publications
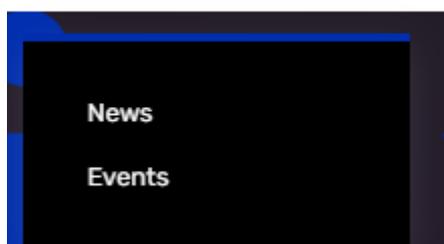

Milestones

Deliverables

The Outputs section of the INVESTech website is dedicated to showcasing the tangible results that will be produced by the project, divided into three main categories: Publications, Milestones, and Deliverables. The Publications subsection will include a variety of research
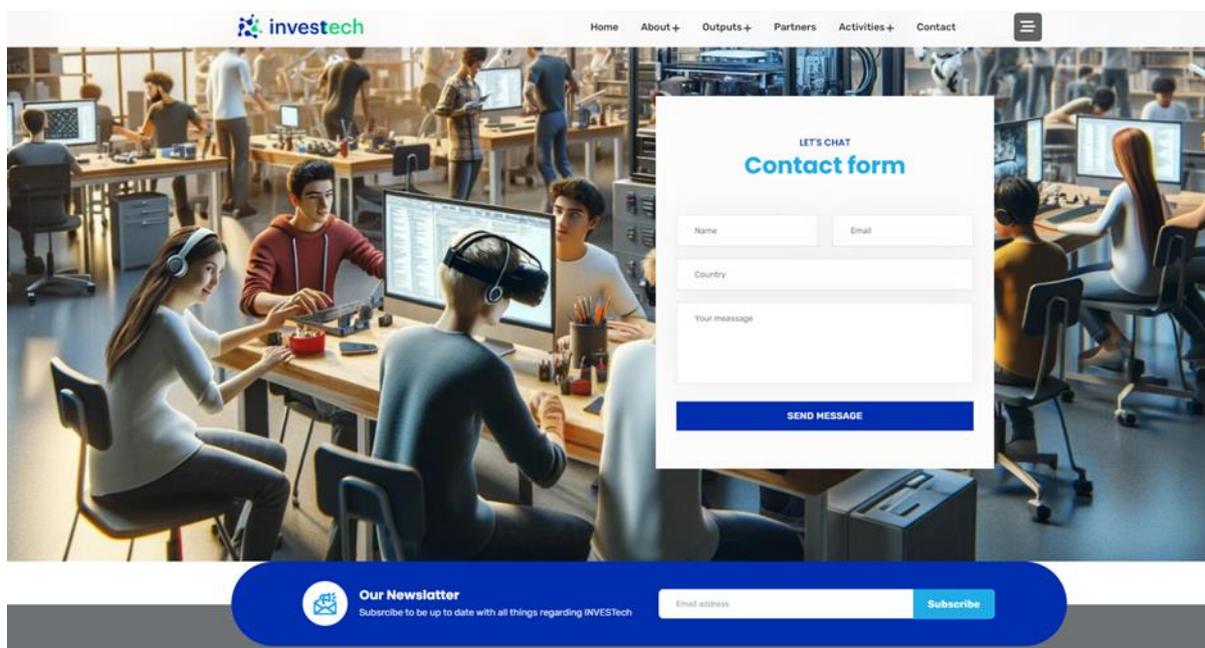

papers, articles, and reports authored by the project team and their partners, offering in-depth analyses and insights into the latest trends and developments related to the project activities. The Milestones subsection will highlight significant achievements and key moments in the project's timeline, providing a clear picture of the progress made and the goals accomplished. Finally, the Deliverables subsection will outline the content developed by the project partners. This comprehensive Outputs section not only demonstrates the project's ongoing impact, but also serves as a valuable resource for stakeholders seeking to understand the breadth and depth of INVESTech's contributions to the field.
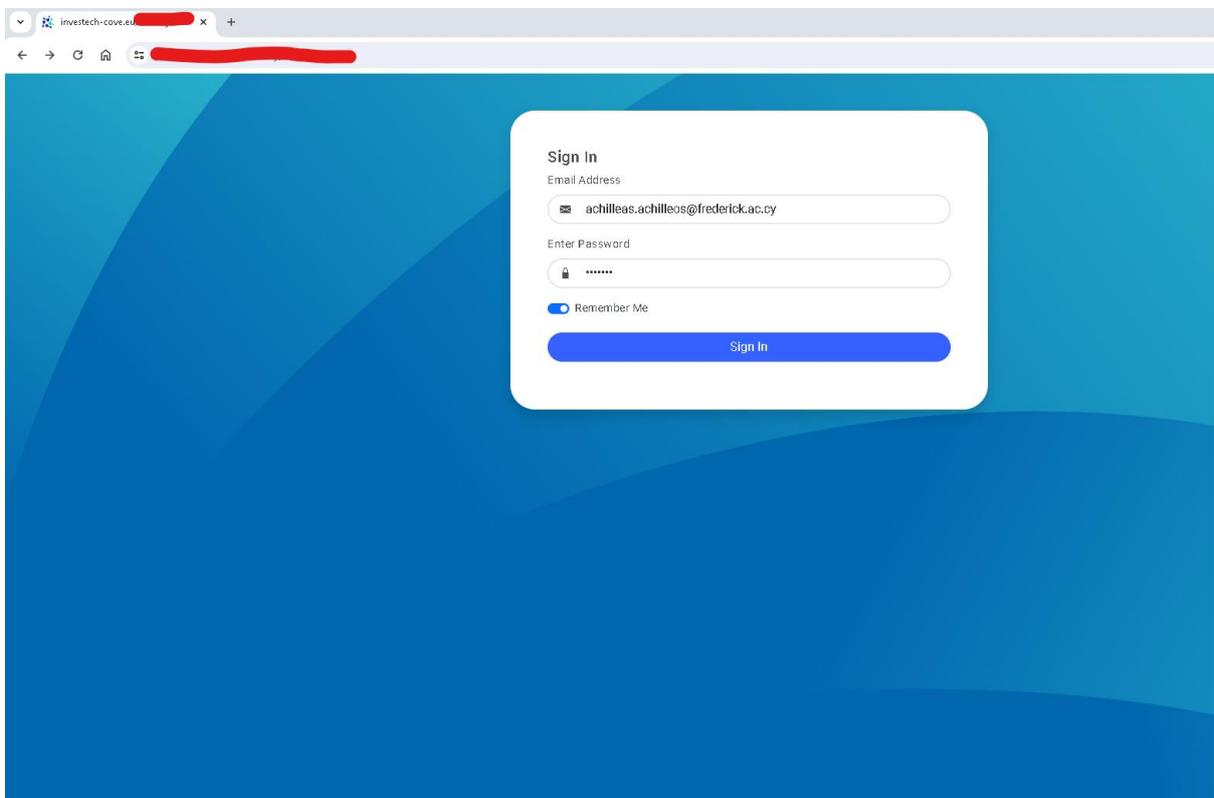

The Activities section, which includes News and Events, keeps visitors informed about the latest developments and upcoming activities related to the INVESTech project. The News subsection will feature articles, press releases, and updates on project milestones. The Events subsection will list upcoming webinars, workshops, conferences, and other events where users can engage with industry experts and gain valuable insights. This dynamic section is regularly updated to ensure that users have access to the most current information and opportunities for learning and networking.

Additionally, there is a Contact form section addressing common questions about the project, which helps streamline communication and provide the option to the website visitors to contact the project team. By offering multiple channels for engagement, the Contact section ensures that users can easily connect with the INVESTech team for support, collaboration opportunities, or further information about the project.

The dynamic sections of the webpage are updated using the content management system (CMS). As soon as the user goes to the login page, known only to partners in the project, he/she enters the username and password to login.
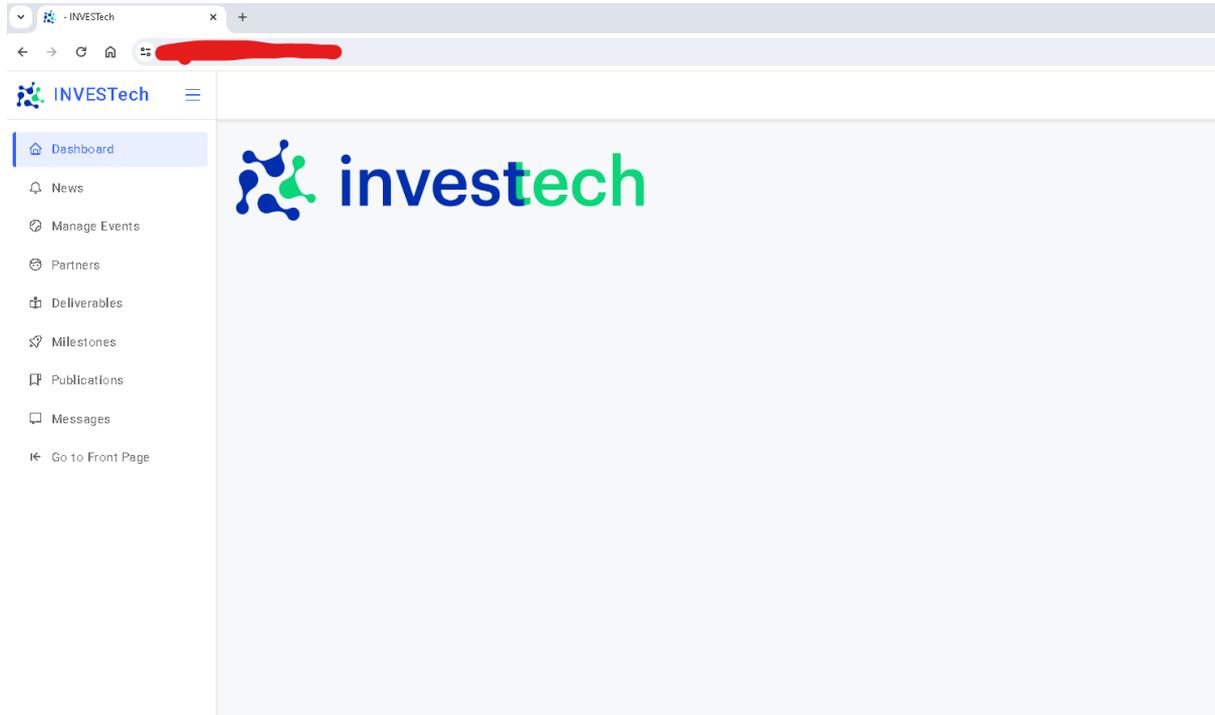

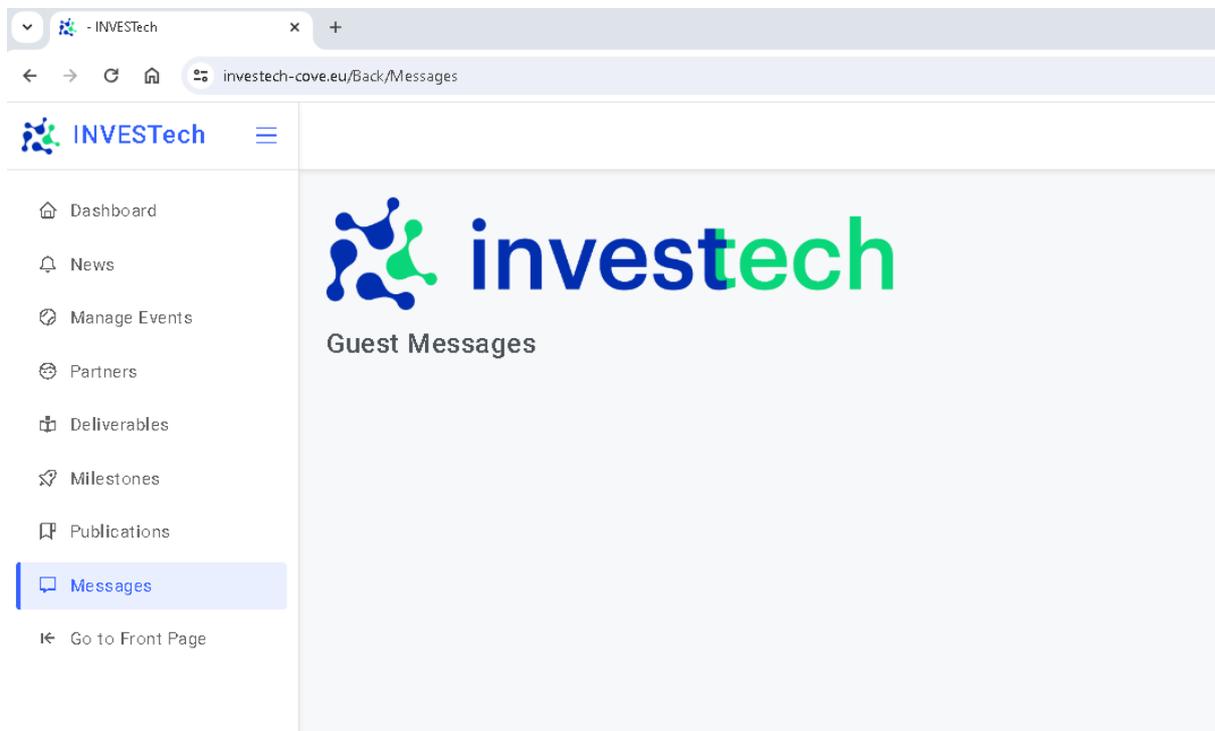

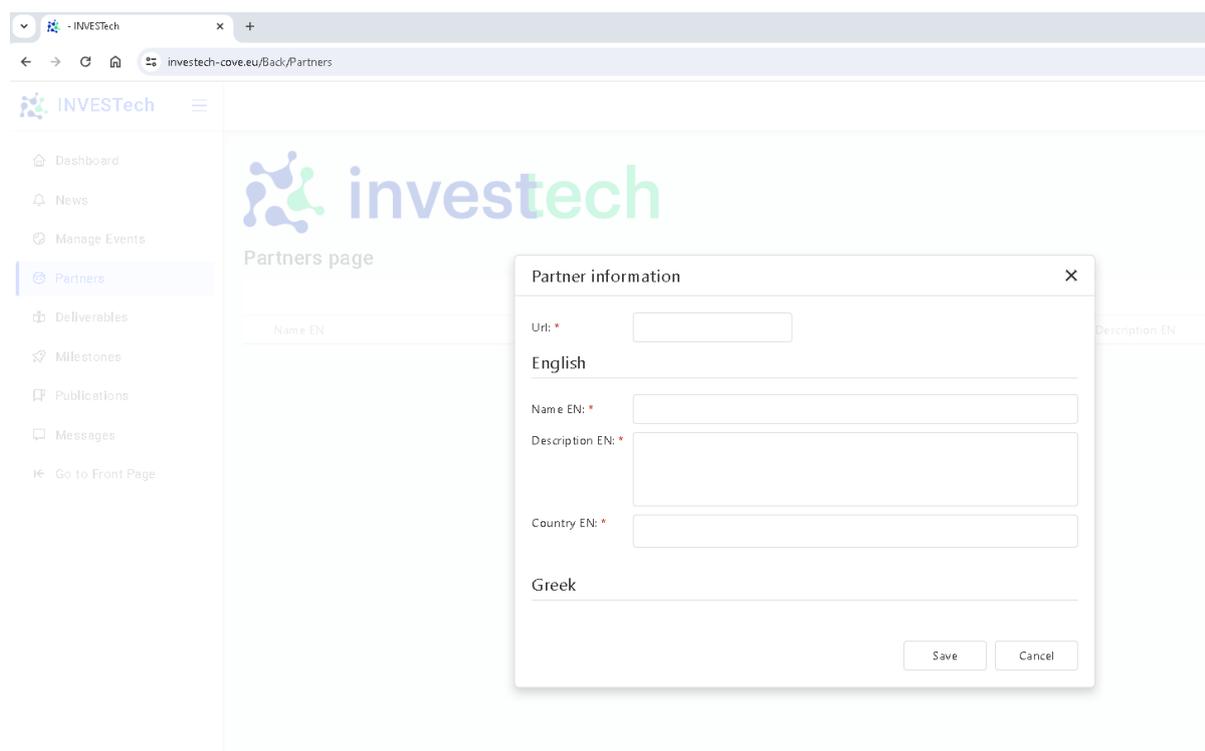

This is how the dashboard of the CMS looks like to the user when authenticated.

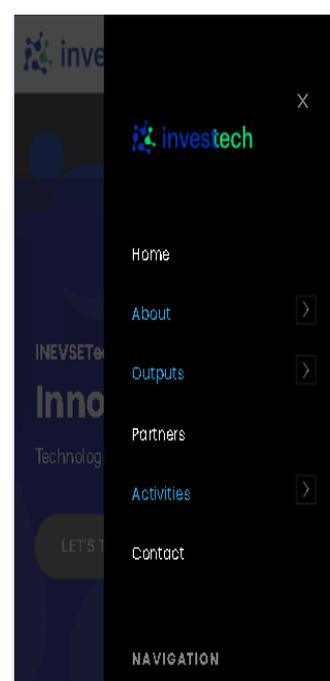

Here the user will be able to see the messages sent by the visitors in the contact us section.

Information such as the project partners (shown in the screenshot above), news, events, publications, etc. can be inserted dynamically from the CMS and appear on the website.

Finally, the website is developed in order to be mobile-first and responsive on different devices as it is illustrated below.

3.Conclusion

The INVESTech website stands as one of the primary dissemination tools for the project, playing a crucial role in spreading information and engaging with a diverse audience. It serves as a central hub where visitors can access a wealth of resources, including detailed project descriptions, objectives, partner information, and updates on activities and events. The site's comprehensive structure ensures that users from different backgrounds—whether they are trainers, education providers, researchers, or policymakers—can find relevant information tailored to their needs. By providing clear and accessible content, the website helps to foster a deeper understanding of the INVESTech project's mission and achievements. The website's content can easily be managed dynamically through the Content Management System (CMS) for which the project partners will have access.

To maintain its relevance and utility, the INVESTech website will be continuously updated with the latest news, developments, and outputs from the project. This ongoing update process ensures that users always have access to the most current information and resources. Regular updates will include new publications, milestones, and deliverables, reflecting the project's progress and impact. Additionally, the website will keep users informed about upcoming events and opportunities for engagement. By staying dynamic and responsive to new developments, the INVESTech website will continue to be an invaluable resource for anyone interested in the activities, outputs and milestones of the project. This ongoing enhancement of the website ensures that it remains a vital and authoritative source of information for everyone interested in the COVEs and the transnational web platform.
